

```
# 1. Create a greeting for your program.
print("Welcome to the Band Name Generator.")
# 2. Ask the user for the city that they grew up in.
city = input("What's name of the city you grew up in?\n")
# 3. Ask the user for the name of a pet.
pet = input("What is the name of your pet?\n")
# 4. Combine the name of their city and pet and show them their band name.
print(f"Your band name could be {city} {pet}")
# 5. Make sure the input cursor shows on a new line.
```

Output:

Welcome to the Band Name Generator.

What's name of the city you grew up in? Kakinada

What is the name of your pet? Leo

Your band name could be Kakinada Leo
